

Aboriginal harvest of gray and bowhead whales in the Russian Federation in 2007

Borodin R.G., VNIRO, Moscow, Russian Federation

The IWC allocated a block quota for subsistence whaling for Chukotka Native hunters in 2008-2012 of 600 gray and 25 bowhead whales.

The Fisheries Council of Chukotka Autonomous region distributed the quota among local whaling enterprises on May 14, 2007. The aboriginal harvest in 2007 was supervised by the Department of Industrial and Agricultural Policy of Chukotka Autonomous Region.

126 gray whales were harvested in 2007.

57 gray whales of 65 allocated were taken in the Chukotsky region, while 20 of 24 were harvested in Providensky region. 100% of allocated quota was fulfilled in Iul'tinsky region (i.e. 49 whales).

The hunters of the Shmidtovsky and Beringovsky regions did not take part in the 2007 whaling season due to technical reasons; therefore they passed their quotas to the whalers of the Chukotsky region.

A total of 48 gray whale males and 78 females were taken in 2007. The body length of the whales harvested in Chukotka in 2007 varied between 8.0 and 13.5 meters with an average of 9.6m. The body weight of these whales was from 6.0 tons to 26.3 tons with the average weight of 10.05 tons.

The largest female was harvested in the Uel'kal settlement of Zapadno-Beringovomorsky region. It was 13.5m long and weighed 26.3 tons.

Scientific supervision of aboriginal whaling was performed by TINRO-center staff (Vladivostok) and by local specialists. A total of 62 taken whales were observed. The furthest transportation distance to the coast was 25 km (Enmelen settlement of Providensky region), while the closest was 0.5 km (Nunligran settlement).

During the 2007 whaling season 3 gray whales were killed but lost and 2 further whales were stinky and inedible.

No bowhead whales were taken in 2007 in Chukotka waters.

All aboriginal whaling data were presented by the Department of Industrial and Agricultural Policy of Chukotka Autonomous Region. Whale passports and other data are shown in the table below.
