## 2. SIGHTINGS DATA

### 2.1 Field work

#### 2.1.1 Systematic

Systematic sighting survey was conducted using the research vessel, Tamgu 3, in the East Sea from late April to May, 2007. The vessel cruised 1043.2 n.m. and completed 63.1% of the predetermined transect lines due to weather conditions and time constraints. During the survey 22 minke whales were observed in 21 primary sightings that crowded in the middle part of the East Sea. Pacific white-sided dolphins, short-beaked common dolphins and finless dolphins were observed during the survey.

Target species	Date	Area	No. of sightings	Contact person/institute and references
